

Installation Guide

Assemble Brackets

Install LifeLadder

Install Brackets.

Position LifeLadder.

Tighten Clamps.
Position Handhold 15-25 cm from quay wall ~ 30-40 cm from center of LifeLadder step.

Install LightUnit

Make sure Supports for LightUnit are installed in Upper Bracket.

Unpack and fix LightUnit to the Supports with 2x Button head screws (included).

LightUnit will automatically turn on at night.

Functionality:
LightUnit charges in sunlight. Its LEDs illuminate the LifeLadder at night.

Avoid shadows:
Lack of exposure to sunlight will reduce performance and might cause LightUnit to not function during winter time.

After installation:
LightUnit may need 2 days of sunlight to 'wake up'.
